**Subject:** Other Potential Deal:

Hey,

I have a company I'm talking to who has built a new cryptocurrency exchange.

I still need to due diligence what they've built, but one of their core needs is that they are struggling to get banking/licensure in a good jurisdiction.

Is that something you'd be able to help with, were we to invest in them?

If their tech is good, and we can get them launched, it could be lucrative.

</=iv>  
Best,

Jeremy
