our visual perception is comprised of a radiation de=ector tuned to a limited band of frequency. this I=imited band of frequency, humans name "visual light=" . It is clear that if our frequency was in =he radio wave band. we would not " SEE " =walls , radio waves as evident from wifi pass through wa=ls . would the walls exist for us ? if=we couldnt percieve them" .- not likely. the=efore walls and the names we give them are clearly human const=ucts. :)

I thought last night co=ld have been more professional as some of the people in addtion to y=u might have had something interesting to say in a better organized event<=div>
gromov is coming on sat . at 130 . you are als= welcome . you and I are on for friday at 330

=div>--

please note<=r>
