Correct; We will be done by the end of January.

Ramon Alonso
Dear Jeffery,

As promised, please find attached some very preliminary images showing the general 3D massing model that we are creating for Great S= James. We will also create one model for LSJ.

This week the topography team will continue working on site as per our schedule and we will have all the definitive information of this initial scope of work ready to be delivered by the end of January.

With this information we will then be ready to start the master plan conceptual design phase. We will soon be sending you a separate proposal for such services.

Kind regards and best wishes for the holidays!
