Jeffrey

Teterboro airport is closed until 4pm due to TFR (Presidential moment most likely).

Fwd airstair valve needs to be changed,, we can accomplish tonight or PBI.

Cockpit is normal, no codes at this time, ADC's are swapped.,

I'm fine flying the plane to Palm Beach if you elect to depart tonight? And installing Valve and ADC in PBI.  
or do you prefer installing the airstair valve tonight and changing the ADC tomorrow morning?

The Airstair Valve is buried behind Capt seat side wall, we should have completed by 10pm if you elect to stay?

Severe weather avoidance in effect in NY area later this evening, not as much for Teterboro area, it's more traffic saturation west and south of New York area

PBI forecast is good tonight, satellite picture looks good as well for our route FYI

Let me know if we should install the airstair valve tonight and ADC tomorrow when it arrives, if you plan on departure tomorrow afternoon?

Thx  
Larry
