Mr Epstein,

Helicopter Pad will be 97 Yards (100' x 4"). That wo=ld be on a level grade and we can get back-fill from GSJ and compact ourse=ves. I think we should look into pour breaks to prevent EB from gett=ng overwhelmed trying to pour 100 yards in one day. If there are any=issues with Barges on pour-day we will have non-structural pour breaks tha= will result in major cracking. Maybe do (3) 34 yard pours on separa=e days. To join the separate sections you just need 2' pieces of=#4 rebar core drilled and epoxied into the joints. That will produce a cle=n structural joint.

Very Respectfully,
=br>
