Mr Epstein,

Helicopter Pad will =e 97 Yards (100' x 4"). That would be on a level grade and =e can get back-fill from GSJ and compact ourselves. I think we shoul= look into pour breaks to prevent EB from getting overwhelmed trying to po=r 100 yards in one day. If their are any issues with Barges on pour-=ay we will have non-structural pour breaks that will result in major crack=ng. Maybe do (3) 34 yard pours on separate days. To join the s=parate sections you just need 2' pieces of #4 rebar core drilled and e=oxied into the joints. That will produce a clean structural joint.

Very Respectfully,

Kyle Reavis</=iv>
