Richard:

Photo 9039 is a leak originating from one of the=two PX units on the skid. This leak has been there since before Gemini =ot involved. We wanted to complete all the other upgrades to the =nit before taking this one on.

Photo 9040 is a leak from the=new cartridge filter housing. We reported this at the time of com=issioning. We filed a warranty claim with the manufacturer on beh=lf of LSJ but they were late in getting the new seal sent to us. =e had planned on changing this seal when we were last on island but the=seal showed up a week later. We will be addressing this leak when=we return to install the new intake pump station the week of January 21=t.

Do you have any update on the status of the new fiber opt=c cable? This needs to be in place and terminated before we get t=ere to permit the control system to be finalized.

Dean

Good afternoon. I visited LSJ yesterday and noticed a few spots with water leaking. Can you please explain so I can understand better. Thank you.
