Subject:	GIV update

Jeffrey
We are going to push the GIV out of the hanger at 2:30pm for ops check with A=U,,
3 harnesses and 3 BUSS controllers installed,.
We Swapped the ADC's and accomplished Pitot static leak,

The ADC from HAPP Honeywell was ordered at 6pm last night, but didn'= make it to Fedex in time, it is scheduled for delivery tomorrow morning in=Teterboro., We are at Honeywell delivery and shipping service since This part is covered=free under our HAPP program.
We have the AirStair valve in hand, but found the old valve sticking, since i='s buried by the Capt's seat,, we lubed the valve and will o=s check shortly, If we need the valve changed we can accomplish in Palm Bch if you want to de=art this evening to PBI,, I'll update you more after we run the APU, around 3pm

My best guess would be 7pm departure tonight if you want?

Thx
Larry
