Subject: Photos of Palms

The following attachments are various palm trees that are available. In regard to your question about survival without water for a period of ~10 days, the 2 that would be the most sensitive to that are the Majesty Palm and the Bismarkia Palm. I have to caution you about the Bismarkia because as I mentioned it is a very sensitive palm to transplant and transport. It would be more successful in a container and not at a mature size. Perhaps, even grown from seed as I have discovered. The pricing guideline varies from palm to palm. When you look over the material and decide what works best for you, if you could please inform me of the size you would like I will be able to disclose prices immediately. If you have any further questions or requests for variety please let me know and I will get it to you as soon as possible. I look forward to hearing from you.

Kind Regards,
