**Attachments:** Untitled attachment 00065.eml (2.40 KB)

Dear Mr. Jeffery,

When I sent you yesterday my attached email, the intent was to go back to square one and as I explained as well in my below email that we will be sending you every second day a sketch to move forward step by step.

Few point we would like to note:

- You asked us in your last few emails for the "NE" direction, so we felt that we need to highlight that this is not the Current House Direction and that the "NE" direction is the Windy one.
- The Current House view is 'S' and the Office / Bathroom is "W".
- We as highlighted the advantages and disadvantages of other views. For discussion.

So first step we will need to fix the direction of the main house (as one block without details) then we will move to step two where we will define the routs, entrances and exits then we move to step 3 where we will define the functions inside the main house (bubble diagrams) in relation to the outer space then we move to other steps one after the other.....

The house manager and pool location can be easily resolved once we fix the above.

The layouts we sent you yesterday at 3:30pm for the Main House was to define the Space Program regardless of the view as we can adapt the functions inside the box when we agree on the location, size and direction of the block.

Regarding burying the house, the intent is not to bury it but to integrate it within the land considering the wind and hurricanes. This will be clear once we show you in 3-Dimension the Architecture Design where our ideas it to have an Architecture as integral part of the land and not superimposed as a traditional buildings. This we will explore at later stage.

We appreciate your patience and we assure you our commitment to deliver to you a satisfactory result.

Regards,

Kifah Laham

the angles should be same the current hous3. this pool fights with the land . looks at the busy dock not -peaceful. , the house manager cannot see the dock and is on the private side of the island. . the idea to block the wind by burying the house is not good. . the main entrance on leaving looks directly into engineering? . please start from the beginning , I can talk today. .

Dear Mr. Jeffery,

It was very nice to speak to you earlier today.

Please find attached the Work-in-Progress files reflecting our understanding of your brief / requirements for your kind review and comments:

- 1) .pdf file for the master plan
- 2) .jpg Sketches for the Main House Planning. Please check these files before the .pdfs.
- 3) .pdf files for the Main House

As agreed, we will be sending you sketches every second day for your comments and guidance until we fix the brief and after that we will develop the plans and architecture volumetry.

Regards,

Kifah Laham
