**Subject:** Courtyard Palm Tree Lighting

Good morning.

With regard to the string lights to be installed from tree to tree it =as become apparent that a steel cable will need to be installed between =he trees first to carry the lights due to the distance between each =ree.

I wanted to ask if you are ok with the cable, in a sense, tying the =rees together. A section of rubber hose would be sleeved over the cable =here it will wrap the tree prior to installation to protect the trees.

Also do you have a preference as to height/where on the tree the =able/lights be placed?

Thank you,  
MG.
