Subject: Crate & Barrel fabric

Good morning.

I hope you had a happy Thanksgiving.

Even though the Crate & Barrel is =olyester, we are confident that we can treat it to pass the composite burn=est for the divan end arms and door faces.

I suggest not treating the carry on be= mattress as it will adversely affect the hand /softness.

The real question is the fire blocked =ivan cushions. If we heavily treat the fabric, it will likely pass t=e fire block test, but heavy treatment will also affect the feel. Since you do not use these cushions that often, if you wan= to ever use the divan for "sitting", then you may want to reu=holster the divan cushions in the same crate and barrel fabric with the he=vy treatment.

Let me know your thoughts so that we may o=der the fabric...?

Best Regards,

Eric
