We are unable to Pull New Fiber in the the Existing Conduit &n=sp;from the Generator Building to Sea Water Intake Pump Controls. The fiber=connection allows the RO Plant to communicate to the Sea Water Intake Pumps=located outside the Tunnel.

The conduit is for the Duct Bank, to b= dug from the Generator Building out to the Sea Water Intake building, &nbs;with a new feeder for GSJ.

At this time the Sea Water Intake pum=s are being run in Manual Mode.
LSJ will Dig, Install conduit and=Pull Fiber.

Can we proceed with ordering Fiber and=Conduit?
