Greetings all, yesterday afternoon Little C's port engine had a malfunction on this morning offshore marine came and diagnosed the motor. There was a catastrophic failure internally, the engine seized up. Offshore can install a new one on Monday, estimate is being worked on. I have on standby Capt Chris on ocean dream ferry, his rate is 450 a trip, so 900 per day, this being because his boat holds 100 pax. As of now we have captain Frederiks but he is only available in the am. All other ferries are under contract with hotels and BVI as they lost many ferries during hurricanes last year. Please advice.

Thankyou  
Carlos
