Place Wi-Fi calls from your iPhone

Turn on Wi-Fi calling in Settings > Phone > Wi-Fi Calling. You might need to enter or confirm your address for emergency services.\*

If Wi=fi Calling is available, you'll see Wi-Fi after your carrier name in the status bar. Then your calls will use Wi-Fi Calling.

\*When cellular service is available, your iPhone uses it for emergency calls. If you turned on Wi-Fi Calling and cellular service isn't available, emergency calls might use Wi-Fi calling. Your device's location may be used to aid response efforts when you place an emergency call, regardless of whether you enable Location Services.</p>

## Add a device

Make sure that the device you want to add has the latest version of software. Then follow these steps:
