Ahhh.

Shit. I wonder if that is why they are so keen to have me. To get to you. Darn.

I have asked asu if I can use my travel money for 3 trips back to asu to pack my office over the next 6 mos and for 3 conferences I have been invited to. I expect a no there.

your friend Larry Krauss plans to come to our Bahamas conference!</=pan>

just got from him this,

Thanks so much. I was planning to register. Just checking to see if I c=n get some funding for travel.

Subject: you are invited to OUR BASIC 2019 CONFERENCE AND OTHER ACTIV=TIES as well, from JANUARY 6-12 ,

2019

Dear Jeff,

You are invited to OUR CONFERENCE IN BAHAMAS, BASIC2019 which will be taking place in Stella Maris in Long Island Bahamas, January 6 to 12 2019

see the announcement of our next conference,

<https://cgc.physics.miami.edu/BASIC2019Announcement.html>

Also, it may be interesting for you to learn about

what will be taking place around our BASIC2019 conference and the future of our BASIC project.

. Walking distance from our conference an amazing development that will change Long Island Bahamas is taking place . Read the full story here in the Caribbean Journal report:

<https://www.caribbeanjournal.com/2018/10/16/the-bahamas-is-getting-a-new-five-star-resort-project/>

<https://www.caribbeanjournal.com/2018/10/16/the-bahamas-is-getting-a-new-five-star-resort-project/>

The developers of this project are very sympathetic to our BASIC project and will be present in our conference. The prospects for BASIC in Long Island look bright! . Come to BASIC2019 and be part in the development of the Bahamas Advanced Study Institute and Conferences!

Best,

Eduardo Guendelman and Thom Curtright

Subject: MY PLANS

=

Tomorrow I travel to=Chile, from there some time in March I will go to the US, both the East Coa=t and the west coast, Miami and Bahamas, probably to Bahamas also with Thom=Curtright from U. Miami. In another development, Zeeya Merali, Science jour=alist told me she would agree to be spokesperson for the center. Zeeya Mera=i has written articles across a range of scientific subjects for Scientific American <<http://www.scientificamerican.com/>> , Nature <<http://www.nature.com/>> =span style="color:rgb(68,68,68);font-family:Verdana, Geneva, sans-serif;font-size:13.5px;line-height:19px;background-color:rgb(255,255,255)">, New Scientist <<http://www.newscientist.com/>> , and Discover <<http://discovermagazine.com/>> . A freelance journalist and author, she has published two textbooks in colla=oration with =i>National Geographic <<http://www.nationalgeographic.com/>> and is now working on her first popular physics book (which i= fact will cover some of my work on "baby universes"). Her documentary, Aperture Fever, about amateur astro=omy, was broadcast on The History Channel, UK, in 2008. She has also worked=on the forthcoming Nova television series "The Fabric of the Cosmos". Meral= received a first-class degree and Master's in natural sciences from the University of Cambridge and a PhD in cosmology from Br=wn University <<http://www.brown.edu/>> .

that is all for now,</=iv>
all the best,
Eduardo

there could be a possibility the ICTP could have some involvement (may be to fund participat=on from cuban physicists?). Also Richard Keywor=, a developer in Long Island has=nbsp;mentioned that he was willing to sell the land needed for the center at a discount and a=so help, using his connections, =o get some (but probably not enough) funding from the Bahamian government. We would like to know to what extent you would like to participate in t=is development, of course we can take your suggestions concerning the favorite topics you would like to emphasize,=for example gravity?, I understand this is one of your favorite topics, since you once organized a conference on t=is topic. I am planning to travel to both Miami and Long Island in March, I could=also visit you for example in the Virgin Islands,

but other places could be as well, to discuss the extent of your participation, your input on what subjects you would like to be

emphasized, what are your suggestions for the name of the center, etc., anything you want,
All the best,

Eduardo Guendelman,
Physics,
Ben Gurion University, Beer Sheva, Israel.
