Subject: Invisible Announces \$2.6M Funding Round

Hey Jeffrey, hope all is well in your world.

I'm excited to announce that my company Invisible Technologies (www.inv.tech) just raised a \$2.6M seed round from Backed Ventures, Loup Ventures, Horizons Alpha, Day One Ventures and several prominent angels.

We're excited to be out in the public after 3 years of building this human-powered chat robot assistant in private beta. So far we've helped almost 200 clients save up to 41% of their day, at \$10/hour.

Thank you for being a part of my journey to get here. If you'd like to try us, use this link to discount \$50 off a starting tier of 25 hours: <http://fbuy.me/kr6Du>
