Good day.

The two voltage regulators purchased from Rimco are on their way back to Rimco along with one of the old ones and are to be programmed by Rimco for our particular gensets.

This same to be due to the fact that Rimco's parts department is not fully aware of the parts they sell. A tech in their service department informed us that they should not have sent the regulators out without programming them first. Hence they are on the way back.

The GSJ generators will =e set in place as soon as they arrive so the Q hut can be erected over =hem. Should I proceed with tie-in of the solar =ystem to the new generators? What is the status with Pro Solar?

Once the generators are =ialized and fully on-line the replacement will be
scheduled with =APA.

We will be on generator for several days while the =placement takes place.

MG.

Hey Rich.

Once I can get a look at the new unit there may be some =rounding lugs,
grounding wire and some misc hardware to purchase. All =mall money.

Good day Rich.

Mr Hodge is not needed. I will coordinate directly with WAPA =n the shut down needed for the removal and installation of the old and =ew switches.

Once the new switch is on island and = have all materials needed I will schedule with WAPA for the work to be =one.

MG.
