Good Morning Mr Epstein,

The poles for the GSJ tiki were brought in to the inside blue l=ne of the previous drone picture. If you would like I can get them b=ought in some more (4-5 feet) to have a smaller building footprint. =he height of the poles is not the finished height, they will be cut once a= entryway height is established and then the A frame will be set for the r=of, like the picture you sent me previously. Please let me know if t=is works with you.

Was the tiki bar d=cking what you were thinking? Please keep in mind we will need to sa=d and stain these boards still.

Very =espectfully,

Kyle Reavis
