Good Morning Mr Epstein,

The poles for the GSJ tiki were brought in to the inside blue line of=the previous drone picture. If you would like I can get them brought=in some more (4-5 feet) to have a smaller building footprint. The he=ght of the poles is not the finished height, they will be cut once an entr=way height is established and then the A frame will be set for the roof, I=ke the picture you sent me previously. Please let me know if this wo=ks with you.

Was the tiki bar decking=what you were thinking? Please keep in mind we will need to sand and=stain these boards still.

Very Respec=fully,

Kyle Reavis
