we are not interested in offsets. . you =arrantied a system. you told me that i would receive = proposal . .
Of course there will be =ignificant damages added to our claim if you think that is the way we =eed to go rich dont
respond to these people right =way, we need always to plan it out.

after patiently waiting many months and having no results =his email it not helpful..
we had multiple conversations =his week regarding your experience with lithium after moving away
from =alt water batteries yet now you are proposing nickel iron battery =ption..
lastly we are looking for you to make good =n your warranty and are not looking for cost offsets vs a
larger =umber
i am embarrassed to send this email to mr =pstein and advise that you send us a real proposal before
this is =emoved from me and turned over to our attorney...
thank you

Morning Richard,

I'm awaiting a vendor response concerning a Lithium Ion storage option but have received some preliminary information I'd like to share.

There is a Nickel Iron battery option which has been the mainstay for the the Nissan Leaf and other electric vehicles.

This has a 30+ year life expectancy (11,000 Cycles @ 80% depth of discharge) and is compatible with all of the supporting infrastructure i.e. SMA inverters. chargers, etc.. Unfortunately there is a 4 month lead time for delivery.

The initial "turn key" cost analysis for this system is \$347,958.00. This is prior to any offsets.

I'll continue to pursue options but appreciate any feedback as we move forward.
