Jeffrey,

The Sound Bar you purchased sounds GREAT! 300w Wireless subwoofer has nice t=ne,, Except the \$100 tv you purchased didn't have Fiber Optic out,, So I purchased a "White" LG TV for \$129 that has Fiber Optic=out, which is the only Input for the Sound bar,, Also, you can BlueTooth your phone to the Sound Bar and Play Music,, The White LG has a Center Post mount, I'm sure Eric can Rig somethin= on the Drink Ledge to secure the TV, and can be easily removed,
