Subject: Fwd: Zorro ranch skid steer

i =poke with Steve and he said machine works mechanically however it needs =utriggers on the back to stabilize skid steer because when=pressure is put on tree spade skid steer lifts up and outrigger would =old our machine down

steve also said our machine has wheels and would not move as =uch with tracks..

steve tried our machine below SR =50 on soft soil at ranch central but it would not penetrate the ground =t all

response below about me knowing it needed outriggers is more =f brice games as he never wanted this project and was complaining from =he onset...

SR-250 skid steer in photo is on Zorro =anch

I was talking with =rice and he informed me that he had sent you a example of the skid =teer with the out riggers

Also the Virginia from titan who you purchased the tree spade =rom said she informed you it would not work without the out riggers or =ire tracks

Thanks =teve
