Good day all , Just wa=ted to give an update on the status of the pool.

The plaster work went=very well , however in the acid wash and power washing of the pool in
prep=ration of putting the Kristacure (sealer) we felt that the pool would be=efit from being filled with water first for a
few weeks .(This is the nor=al start up procedure) During this time have Smiley brush it daily or as =ften as he's able , to
even up the surface a little better so when it&=39;s sealed the pool looks the best it can.

The Blue=and other colored plasters are very difficult to get the finish uniform an= I'm confident this
additional step before sealing will do the trick.=C2

It is important that the PH stay at or close to 7.0 for 30 days .(this is done with the addition of Muratic aci=) Additionally chlorine can be added on Friday . No calcium is to be used= The salt system should not be used during this time as well.

<=iv>After this period the pool can then be drained and sealed as planned.</=iv>

Please call me or email if you have any questi=ns.

Thank you

Rick Rossi
