Mr Epstein,

Dupson is finished with the dock apron and I wanted to confirm we wi=l have him move onto the barge ramp next.

=div>He will need to collect stones over the next few days for the ramp. =A0 The design to confirm is to match the dock apron visually. Do you want =ny boarders like on the dock apron?

The process w=ll be as follows;

- Collect stones
- Jack=Hammer up stones (2" removed from surface)
- Stone Facade- t=is will be set on top of rough surface, we will be using a bonding agent (=ost likely Intralock) to bond the new cement to the set concrete to add mo=e compression strength for the live loads coming off the barge

=div>

We can do a small section first if you would like. =A0 Please let me know what you think. Thank you!!

Very Respectfully,

Kyle Reavis
