Subject: Fwd: PBI Garage

Carluz stated that the center is 21" and sides are =8"
Carluz said we can only go another 2-3"=as it was measured with parked cars inside

Other option would be to go to =4"-30" without cars in middle spot

Please advise
Thank you

We measured it base on parked cars inside
which is the least that we could do unless we want to go =urther 2-3" inches more , we cannot put car inside
already , =hanks

Here is what we can do , not to use =iddle garage instead use both sides cos' we have 2 Suburbans, we can
=xtend to 24"-30" if we want to without using middle spot. =hanks
