Morning

Regarding dock wood

Sylvest=r indicated the hard wood ordered after the hurricanes was for the replacement Storm S=utters in the main compound, no hardwood was ordered for the dock I contacted Jimm= H=s Crew routed edges, but did not cut to length, 1 bundle of Pressure treat=d wood, which was left exposed on top of the Desal Building The wood on the d=ck match's what was exis=ing, except for 4 pieces, which will be replaced please note we sorted thru 3=stacks trying to fine reasonable wood to lay

As d=scussed at Friday's meeting last week, the dock will have a heavy foot and buggy=traffic on it for the next 2-3 months Recommend Sand Stain and marine varni=h finish the dock to protect wood Research alternative dec=ing, that will be =ore durable to heavy traffic Can we proceed with finishing the dock ?=/div>

Brice
