Jeffrey,

Jay informs they will be done Wed at 4:30pm,.Jay would rather wait for d=awer inserts until we provide the exact dishes and flatware??

I'm going to Islip tomorrow even=ng,

One item i think needs=address, is the Veneer cover removal handle for the Fwd monitor, Jay suggested a Suction cup to pull the veneer from the Velcro,,=div> Do you prefer a clear plastic handle or veneer h=ndle at the bottom to grip to remove, Or something el=e? Or as is?

See photo bel=w

From Jay:

Larry,

We are shooting for being complete on Wednesday p= (4:30 <x-apple-data-detectors://1>) I would hold off on inserts until you have what you want to u=e.

The forwArd monitor closeout.....well you can have a permanently mounted=tab (clear plastic, leather, etc) a wood tab (but it will protrude off b=lkhead) or we can make a small notch and you could use something to p=p it off.

That's the only reason I suggested a small suction cup so i= would look as it does now and would be super easy to pull off. But it =99s your call Capt. tell me what you want and I'll do it.
