Should i look into world water solar?

=br>

The other company brad from pro solar referred to was elemen=al water makers.

Per Brad: They have system that mak=s just over 11K gal per day. This system will use 80kWh. Any systems
large= than this will need additional solar production from GSJ current plan .=C2◆

Rich,

As we d=scussed, I have been involved with a solar energy/water company for =everal years (my long
term friend and Puerto Rico business partner for mor= than 20). The company has a proven and patented self-contained

system that uses solar panels to run a water purification system that makes dirty and contaminated fresh and/or salt water drinkable. The systems are of different sizes, with the larger ones able to purify tens of thousands of gallons per day (though less for salt water). I understand that my Puerto Rican friends are trying to get a unit or two sent to Virgin Giorda and/or the SVI.

The website is WorldWatersolar.com <<http://WorldWatersolar.com>> Let me know if you would like more information.
