Subject: Office Update

Good morning,

The AYH generator is down and they don't know when it will be fixed. We were trying to see if we could use part of the old Trust Asset office as opposed to setting up on GSJ but, with no generator power, it makes no sense.

WAPA contractors are in the Red Hook/Nazareth area but when I asked if the new when RH would be energized, they did not have a guess. I've reached out to Greg Rhymer of WAPA since there has not been a public statement re a power schedule in a week.

I met with Anna yesterday and many of her staff need tarps. There seems to be no tarps on island even though FEMA has been supplying them. I'm told that the FEMA tarps have been rationed out on a "who you know" basis. Home Dept remains closed as their engineer told them that the roof is too unstable to be open to the public.

Gas and food lines have gone down as more and more vendors have opened their doors. Every place save a very few is operating on a cash and carry basis since internet access their retail systems and CC companies is almost nonexistent and power is a challenge.

The airport remains closed to commercial air traffic today because the terminal is worse than originally thought. Many flights were canceled today.

With warm regards,

Cecile
