Jeffrey

I'm finished with G550 class,

Simuflite Dallas has a new G550 simulator, all SIMS actually mimic an actual=serial number G550. It's 2 years old, The interesting item, it has EVS2 installed, which is an upgrade from our EV=1 system., I was most impressed with the clarity of the picture, compared to our first G=N EVS on our G550,.

I was landing in Zero / zero (ceiling and visibility) without using Syntheti= vision, i was just looking at the EVS screen,, Typically you transfer from EVS to Synthetic vision on your DU1 Tube,, Pretty amazing stuff,

Also Gulfstream is coming out with a software update for synthetic vision in=our plane, which will have 3D taxi chart info like the software used in the=new G500 / G600 plus other feature upgrades

I've requested pricing from Rusty already about cost to upgrade to E=S2 Software grade is not available yet not approved

I look fwd to your return to USA.

Thx
Larry
