Hi Richard: Hope you had a nice weekend. Just wanted to provide some additional information, regarding what we would be able to show you during a factory tour in Marseille, France. We normally take about 2 hours to provide the below, with the latest information on the H160 program:

- H160=Final Assembly Line (FAL)
- H160=System Helicopter 0. This is a non-flying prototype that is being used to validate all of the on-board systems and avionics.
- H160=Dynamic Helicopter 0. This is a non-flying prototype that is being used to validate dynamic components that have been operating for quite a while.

In addition, if you wish to visit any other Final Assembly Line and/or other areas of the factory (Logistics, Training, etc), we can easily organize.

Thanks, Glenn
