Subject: Re: More genetic editing (cont.)

Alright, from the department of crazy plant stuff....

<=r>"Fusion of bull and human sperm with Nicotiana protoplasts"

<http://diyhp.us/~bryan/papers2/bio/Fusion%20of%20bull%20and%20human%20sperm%20with%20N=cotiana%20protoplasts%20-%201983.pdf>

<<http://diyhpl.us/~bryan/papers2/bio/Fusion%20of%20bull%20and%20human%20sperm%20with%20N=cotiana%20protoplasts%20-%201983.pdf>>

Agrobacterium is what causes those tree warts, biohackers wander around in forests and harvest those =amp; use that for DIY at home gene transfer to plants.

I will assemble + send you some specific references for my genetic editing projects.

Other=updates:

- proceeding with more mouse testing at my ukraine lab (series/microinjection)
- amateur in Mississippi has been testing human sperm modification (just fluorescent tagging so far, doesn't work for my purposes yet)
- this weekend I'm heading to <http://biohacktheplanet.com/schedule-2018/> <<http://biohcktheplanet.com/schedule-2018/>> in SF (garage biohacking conference)
