Subject: Catching Up

Dear Jeffrey

I hope you've been well. = wanted to update you on what I've been up to for the last two years. I wa= also hoping to talk with you to see if I might use the foundation's Lexin=ton office conference room from time to time for my work and what I could =rovide in exchange for that. I am cc'ing Rich because I'm not sure if you =till use this email?

Since working for your found=tion, I continued to publish as a journalist [REDACTED]

[REDACTED] Regenerative medicine is a =apidly evolving field, and one that forces the medical industry to shift t=er focus from addressing symptoms of disease to fundamental evolutionary =hortfalls.

[REDACTED] The co=cept of the latter gene vector is really intriguing in that a master trans=ription gene completely restored liver function by rebalancing genetic exp=ession and thus proteostasis.

While I don't reall= need an office at this point, I do need access to a conference room from =ime to time and it would be hugely helpful if I could access the foundatio=s. If there was some work that I could do for the foundation in exchange,=I would be delighted to do that.

It would be wond=rful to catch up with you as well.

all the best,<=div>

=br>
