**Subject:** Re: Flag Pole Cabana Awning

It =oes. There is an adjustment as to the angle of slope when extended and =t has been adjusted up as far as possible. It would seem =hat a higher mounting height would be ideal for this type of awning. =lso the wind is presenting a considerable problem as the self =reservation mechanism these awnings come with does not like to allow =he unit to stay open long.  
It might be that =hese are not hardy / sturdy enough for this location.

yes but it seems to angle down when opened.

On Tue, Jan 29, 2019 at 8:06 PM michael =lidden <[REDACTED]> wrote:

The mounting height was limited to 8 feet =aximum due to the existing gazebo structure and the concrete roof =iles.

The structure at the main compound pool is 9 feet =all and also has a flat roof that allows options for =ounting.

We have not started work on mounting the =wning at the main compound yet.
