Subject: Amy Dempsey's visit

Good morning.

Yesterdays visit from Amy went well.

She was shown the structure Jules built at holy shit point from both =he water and from land. She recommended that we purchase floating booms =nd some other items of which she will be forwarding supplier =nformation today.

She also recommended that before we start any removal work that all =aterials be in hand and that she will be sending a letter along with =ur lawyer to DPNR outlining a schedule for removal so that all involved =re aware of what is happening and when.

I also showed her all projects currently underway and scheduled to =tart, such as all trenching for the new desal system, the two new =reatment systems, the bunker and the Christmas Cove container =structure.

With regard to the desal system, I would like to share with her =emini's site plan that shows all the trenching in detail if =hat would be acceptable.

Also we went over the underwater cable locations on both GSJ and LSJ. I =xplained the proposed location of the transformers on each island and =he idea for trenching on GSJ. The actual underwater path between the =lands was discussed along with the actual installation of which Amy is =f the opinion we can do it without an expensive large ship due to the =irect path and reasonably short length. A good topic for a later =iscussion.
