Good morning, =ir,

Ghislaine from Kitchen solutions brought thre= samples of white quartz countertops. I took two photos of each sample - o=e against the countertops Kenny installed, and one against the cabinets.</=iv>

Option 1: Actually matches Kenny's countertop a=most exactly, but it is the least white of the three. I think it looks kin= of dirty next to the cabinet.

Option 2: This one was lighter than =enny's tops. It seemed the closest to matching/coordinating the white =abinets.

Option 3: This is two identica= samples side-by-side to give you a larger image. It is the most white and=will stand out slightly from the cabinets.

In order to pr=vide an estimate, she needs to know:

1. The color/brand selec=ion. I think you would prefer #2.

2. The thickness. Quartz comes in a 1 3/16" option and will be seamless. T= get 1 1/2" (or any depth desired) the edges will be mitered. Would you still prefer 1 1/2" or go with 1 3/16"?

</=iv>

3. The finish. Since the cabinets have a gloss to them, I think you would prefer the polish finish.

For the outdoor tiki kitchen she recommends a natural stone such as quartzite/granite and will send photos of samples.

Do you want to proceed with 1 1/2" for the thickness so she can write up the estimate?
