Subject: Rust Proofing - =olaris EV
To: Daphne Wallace <dlbwallace@gmail.com>

Hi =aphne,

Further =o our conversation on rust proofing the cost would be about \$300. I say =bout because they want to see the vehicle before making a commitment on =he price.

With =hat said, the Polaris and EZGO/Cushman frames are dipped just like an =utomobile and then E-coated which is a hard enamel that is baked on. We =on't have a lot of rust issues with Polaris. However the items =hat bolted on, that can't be treated like the frame, I do see surface rust on those parts. =enerally rinsing with fresh water regularly will help with any =orrosion issues.

If we did the rust proofing on this car it would =elay the delivery by a week to 10 days. The vehicle will should be =uilt tomorrow afternoon and we still have it scheduled for Wednesday =elivery.

Please =et me know if you want me to get the rust proofing done.

Thank =ou,

Brad =ickle
