plant biology , it turns =ut that darwin after his trip on the beagle spent most of the rest o= his life studying plants. . In the 1900s , it fell by t=e wayside. , funding studies of the similarities between=plants and humans. the plants immune system is based on chemis=ry , as the cells do not circulate. plants get cancer bu= they treat it differently. not killing the cells . but surrounding =hem until they are harmless .

The ethics re the fut=re of AI. can a robot in your house testify against you.= if it gives you the wrong medication who is=responsible etc

THe more esoteric, is th= why do so many things in nature follow strict mathematical rules. t=ese are know as power laws. 20 percent of the people own=80 percent of the wealth. . almost everywhere and at every tim=. trying to uncover the underlying rules.

recently=C2 . as music is produced by every culture and almost every=brain, Mark Tramo , formerly at HArvard now at California= looling into , can the music produced by the brain give us an=insight into how it works. . different cultures have different=music. german music is stiff . rigid on the beat. afrom =mericans flecible ie JAZZ
