Dear Amphibious Enthusiasts,

The first few months of 2019 are also the last =ew months of our financial year, so it has been a time of both new =eginnings and intense planning for the year ahead.

While we make plans to continue the consistent growth Sealegs =as enjoyed in the last few years, we should always take the chance to =eflect on and enjoy what constitutes every day life for the =akers, sellers, advertisers, managers, reviewers, owners and =nthusiasts of amphibious boats.

In =hat vein, please enjoy the collection of "2019 so far" Sealegs =ighlights below, and I will be in touch again to share our financial =result in a few months =ime.

<x-msg://137/#OBR>

Onetangi Beach =aces

A beautiful day =n Waiheke combined with a fleet of Sealegs and our always passionate =ealegs Amphibians resulted in a spectacular time had by all.

System 100 Story

Reflecting on the recent release of the =enator SL1170 with Sealegs System 100, I realised the history of our =arge-format amphibious enablement system hasn't been told all =n one place before. With that in mind, I put together the "Sealegs =ystem 100 Story".

Read =ore Below <x-msg://137/#SYS100>

<x-msg://137/#MALAY>

Sealegs sets records in =alaysia

Sealegs have set =wo more records in Malaysia - one for the largest assembled fleet of =overnment-owned Sealegs, and the second for the longest journey taken =y a fleet of amphibious craft.

<x-msg://137/#9R>
9.0m Hydrasol RIB =view

The 9.0m Hydrasol =IB is creating an impact around the world - a great example below in =his review by one of Europe's foremost boating magazines - Motorboat =amp; Yachting.

Read =ore Below <x-msg://137/#9R>

After the unfortunate =ancellation in 2018, our goal was to make the 2019 Onetangi Beach Races =he most fun-filled & action-packed Sealegs event possible.

The races were held on Sunday the 17th of =ebruary and proved to be highly successful, with over 25 Sealegs parked =n the beach and a record number of more than 200 guests in the Sealegs =ent!

We once again held the Sealegs Speed =ace - an adrenaline-fueled event filled with unwavering competitors in =spite of unfavourable conditions, and the Sealegs Exhibition Race, =rawing the full attention of the crowd with wild and wacky themed =ostumes.

Speed Race Winners

1st: Craig Donaldson & Crew
2nd: Simon =arding & Crew
3rd: Bob Fisher & Crew

Exhibition =ace Winners

1st: "King =eptune's Crew" (Capt. Scott Burridge)
2nd: "Mexican =iesta" (Capt. Grant Paterson)
3rd: "Cool Runnings" (Capt. =im Duffet)

You can check out =he full photo gallery for the event here. For information on =ur upcoming events (to make sure you don't miss out), follow our =acebook page here

Sealegs System 100 was developed several years =go in response to a growing demand for large-scale amphibious =raft.

Since then, this Amphibious =nability System (AES) has been integrated onto several large vessels =or various applications including recreational, military and =ourism.

The history of the creation and =velopment of the System 100 AES has not been told in one place =efore - until now.

Read the story here

On the 29th of March, twenty seven Sealegs craft landed on Langkawi Island, Malaysia, setting two records in the process.

The first for being the largest assembled fleet of government-owned Sealegs anywhere in the world by the Malaysian Civil Defense Force (APM), and Fire Department (BOMBA).

The second for the longest trip undertaken by a fleet of amphibious craft, which was registered in the Malaysian Book of Records. The fleet took off from Melaka State on the 21st of March, travelling more than 700km north along the East coast of Malaysia to Langkawi Island and making re-planned stops to demonstrate the advantages of Sealegs technology for emergency response.

Read more about the expedition here

Recently, we completed a video shoot with the 9.0m Hydrasol RIB & 7.7m Sport D-Tube.

Our goal was to highlight the key aspects & benefits of the "ultimate fishing craft" 7.7m Sport D-Tube, and the "family day-tripper" 9.0m Hydrasol RIB in their ideal environments.

The videos are now available to view on Youtube here:

- * 9.0m Hydrasol RIB
- * 7.7m Sport D-Tube

For more information on the featured craft, visit our website.

Sealegs is well into the boat show circuit for 2019, with Seattle International Boat Show in the US in the books as well as various shows throughout Canada. There are many more shows on the calendar for Sealegs - a full list of which you can find on our website.

If you have a local show that you'd love to see Sealegs at, drop us a line at info@sealegs.com and tell us all about it.

BOAT REVIEWS

</body>

In the previous Sealegs update, we introduced the Senator SL1170, the first recreational & largest craft to have a Sealegs System 100 Amphibious Enablement System integrated into it.

Last month, Boating New Zealand reviewed the impressive vessel, giving it an overall rating of 4/5 stars (based on performance, economy, handling, value, build quality, and specification).

The SL1170 clearly made an impact, enough to get it onto the front cover!

You can read the full review of the Senator SL1170 [here](#), and learn more about the Senator SL1170 on our website [here](#).

Last year when we released Sealegs Electric E4 it attracted wide attention from several boating magazines & web publications. One of these was a mainstay of New Zealand boating mags, Pacific Powerboat:

"With electric being the way of the future in virtually all transportation, Sealegs have a winner on their hands, and in time I could imagine that most of their boats would be sold with this system. It is a promising step forward for Sealegs and clearly shows they are not afraid of embracing new technology, much like they did 17 years ago."

Read the full review [here](#).

Motorboat and Yachting, one of the largest European boating magazines, took the 9.0m Hydrasol RIB out for a boat test and review.

The reviewer once broke the record for crossing the English Channel in an amphibious boat (way back in 2005) on a 5.6m Sealegs, and was very impressed with how far the technology has come since then.

MBY did a full video shoot of the review, including some fantastic footage of Foyle Harbour and surrounding areas, which you can watch [here](#).
