Subject: Re: PreAmp Flag Pole

Jeffrey

I've been looking for a good Stereo PreAmp for the FlagPole pol system,

Audio Advisors and BestBuy have a Macintosh C52 solid-state PreAmp with 8 band EQ.

Fiber optic input,&nbs=;

See attached link:

<https://www.mcintoshlabs.com/products/preamplifiers/C52>
<<https://www.mcintoshlab=.com/products/preamplifiers/C52>>

List price \$7,500

audio advisors price to you: \$6,375.00

Do you think this is a good choice?

Or should I keep looking?

Thx<=div>
