The idea is that in the VI Stem would build a "Community Facility&q=ot; to

Grow

Cultivate

Process

Commercial production of Cannabis

Under the new bill

Commercial production is limited to 1000 plants per license

The government of the VI could benefit by having a professional operator=building and running a large central high tech facility

Stem could bring it's technology , expertise and brands . The govern=ent could benefit as this could be a one stop shop for compliance and tax =ollection

The second question , what name should I put the shares into

Can we speak later about the above,

David
