Dear Robert,

Thank you=so very much for having me on your show again. I thoroughly enjoyed our di=logue and hope we can continue the conversation off-camera. I would love t= get together socially when you are in LA.

Please=allow me to extend an open invitation to my Music, Mind & Brain semina= this Spring Quarter and the coming Fall Quarter - the classroom (1344) is=just few doors down the hall from Popper Theater in the music school. Hard=to believe we are entering the 23rd consecutive year since its inception i= the Harvard Mind, Brain & Behavior Interfaculty Initiative. And there=#39;s much I would like to share with you about The Institute for Music &a=p; Brain Science's missions in neuroscience, education, medicine, and =elated technology development that were hatched by our founding board memb=rs in the mid-2000s - among them David Hubel, George Martin, Bob Freeman, =ike Gazzaniga, Nick Zervas, and Bernie Krause. (As I'm writing this mi=sion list I'm realizing we did not get a chance to talk about the pote=tial for music and the arts to ameliorate the pain, anxiety, and/or depres=ion experienced by patients of every age - premature infants to centenaria=s - suffering from practically every disease state. I'm available, of =ourse, if you want to visit that topic for this CTT show or a future one.)=/div>

Best wishes for the successful wrap of Closer To =ruth's episode on music, mind & brain!

Warmly,  
Mark
