Daphne:

Based on feedback from the last two vendors, we are looking =o have the 25K SWRO unit (20 ft container) and the associated equipment =icked up at our facility on Tuesday, April 2nd. We will need a second 20 ft container to load =he "associated" equipment. Ideally, the second 20 =t container could be delivered on a lowboy large enough to carry two 20 =t containers so it and the 25 K unit could ride back to south Florida =ogether. If this is not possible, we need to know so a crane can =e scheduled to pick up the 25K RO container.

As for the HPDE for the field piping, this will arrive to our =upplier on Tuesday, April 2nd. They will =eliver to the Medley later that week. Looks like everything could =ail together late next week.

Please coordinate everything with Sean as I will =e traveling next week.
