Subject: Submarine Cable Project

We are moving along quite quickly now and I am going to be able to modify the landings as a part of the rebuttal and it won't slow us down at all. So we will be going with the short cable from south of the LSJ dock to the new dock on GSJ straight across the channel.

It would probably be a good time to start ordering the cable etc since those take some lead time.

Call me if you have any questions.
