Jeffrey

There are over 40 G550 clients signed up for KA Band JetX Wifi install. Rusty got us the second or third install slot since we are doing Paint.

Rusty and Gulfstream SAV need our definite answer today regarding what we want to accomplish during paint so they can arrange their schedule.

If we elect to install Wifi, Xm weather and New wood, Savannah wants to give our Oct 11th paint slot to another G550 paint job, Rusty wants the aircraft Oct 1st to start avionics install and remove the wood. We would go into paint Nov 22nd, with completion Dec 31st.

Note:

Avionics install during paint doesn't save us time, since no work on interior and exterior is possible while aircraft is in paint booth. Only advantage is removing the wood before paint, since that work is accomplished in their shop.

Wifi install is 4 weeks

Wood is 12 weeks

Paint is quoted at 26 working days / 5 weeks.

\*\*\* More Wood samples should arrive LSJ Thursday from SAV.

Options 1

Full install: Paint, Wood, Wifi & Xm weather.

(Oct 1st input - finish Dec 31st)

Input Oct 1st for wood, wifi, Xm weather, install New Engine cowls.

Completion Dec 31st.

Option 2

Paint, Wifi and Xm Weather only.

(Oct 15th Input - finish Dec 31st)

Input Oct 15th for engine cowls install, for Wifi, Xm, and Engine cowls only= paint slot would be Nov 11th with a completion of Dec 31st.

Option 3

Paint only.

(Oct 6th Input - Finish Nov 17th).

Input Oct 6st for Engine cowls replacement, and keep our Oct 11th paint slot=and completion around Nov 17th.

Rusty / Gulfstream needs direction from us today, he informs he's getting a lot of Pressure from Savannah regarding what we want to install?

(Note, Gulfstream / Rusty mentioned we have canceled large installs in the past, ref the upgrades to Synth Vision, FMS Software and Wifi in the GIV 2 years ago) Rusty was cordial while saying this.

Please advise (if possible) what I should tell Rusty?

Thank you,

Larry
