**Subject:** Plan D LLC - divan fabric direction and door detail

Hi Jeffrey,

The divan fabric as you may well know has a slight l=near direction to it and the lines run the 51" width of the bolt, no= into the roll. Pic attached

With that being said, due to the 80" length of=the 1pc back and bottom cushion, the fabric lines will need to run up and =own the cushion and coincide with the carpet lines.

If you would like the fabric lines to run FWD to AFT=(front to back) than we will need to add a seam on the cushion.=/p>

Please confirm.

Additionally, I reviewed the divan doors again and i= we did a welting in the shape of a rectangle the corners will never be sh=rp. What if we did the welting straight across the doors, just below=the latches? Just one bead. I attached the door (36"x11") with some taped up lines for a better visua=.

We look forward to your feedback. <=o:p>
