it should line up with window above. . as shoud the platfo=m. . we might make one side a trunk and the other a foot  
stoo=

On Sa=, Aug 5, 2017 at 8:31 PM, Eric Roth <[REDACTED]> wro=e:

Attached is the prelim dwg. - For ref only. Need to =hange length dimension. Anticipate 2" vertical lip. Yes we  
can =dd belts / straps.

I just got to Aruba with family- back in office on Thursday.

I will have eileen or jay get you dimensions to see what feels aesthet=cally correct for both length (space  
between #2 seats and new arm rests). =hen eileen and i looked at this yesterday, we though the "footprint&q=ot; should  
be about 21.75" inboard / outboard. Using .50" composite wrapped in leather, leaving room for a 20&=uot; wide chest  
(the same width inbd / outbd as the width between the arm =ests of the seats).
