The Last Paradox: Does the Universe Have a Mind? <<http://www.sfgate.com/opinion/chopra/article/The-Last-Paradox-Does-the-Universe-Have-a-Mind-11246525.php>>

[www.sfgate.com](http://www.sfgate.com)

By Deepak Chopra, MD, and Avtar Singh, PhD [...] very recently it was nearly laughable among physicists to speak of a conscious universe, and yet the notion now seems to be not only respectable but necessary. The small answer looks at the most microscopic level of nature, the quantum field, and tries to define how subatomic particles could possibly contain the potential for consciousness. The molecules inside the human brain are as ordinary as the water, salt, and minerals in the ocean or the carbon in a lettuce leaf. The existence of the cosmos is often described as "something out of nothing," because the ground state of creation is a kind of zero point, a vacuum state devoid of space, time, matter, and energy. (Technically, "nothing" is a misnomer, because the quantum vacuum contains the potential for every bit of matter and energy in the cosmos, existing in virtual form.) The fact that space, time, matter, and energy sprang from nothing makes it easier to credit that consciousness did the same. There a
