Hi Jeffrey,

Thank you for the trip It was really =elpful to stay on the island once again, in order to precise more the =roject. Please find attached a visual of the basket on =SG.

- =u class="">Bismarckia nobilis (blue latan palm) will handle much =ore wind) you should get rid of the coconut.

- New stone wall will be =icer as all surrounded walls are well shaped. having those boulders =akes it too rough today.

-Alamanda flower, should get ok. Just =hange the one that has trouble to grow.

Regarding GSJ , I'm putting =everything together this week (new idea, new locations, details etc...=) and I shall send you a file at the end of the week. I'll be =available in three weeks to make the first road and some =ath.

Best=regards,

Kevin.
